RE : ECO PROJECT VILLAGE NATURE LA REUNION

-
-
This particular project is situated on Reunion Island in the Indian Ocean.

Started in 2001 it consists of 20 luxury solidwood accommodation units, a main building with reception and restaurant, two conference centres, boma and wellness centre.

The site is a sensitive forested area. Due care was taken to preserve the natural environment by elevating all the structures above ground and transporting all structural materials on site manually.

All the structural work was completed by Homecare Construction using kits pre-manufactured off-site in Knysna. The quality of final finish was exceptional, which makes this lodge a reference for the tourism industry in Reunion.

Yours sincerely

FRANCOIS P. NAUDE (Jnr)
