RE : ECO-SENSITIVE CONSTRUCTION FREGATE ISLAND SEYCHELLES

When Fregate Island came up for re-development in 1998, NST and Homecare construction were invited to participate, along with other specialists in various fields right down to re-establishing the indigenous vegetation.

Again Homecare completed all the structural work for the infra-structural part of the development just prior to commencement of the main hotel complex.

All their work was completed on time and delivered to very high standards while operating in under difficult conditions in the tropical climate and dealing simultaneously with exceptional logistical challenges.

Yours sincerely

FRANCOIS P. NAUDE (Jnr)
